skin regeneration**

Oxana DILLMANN

BEAUTICIAN

Head of the Luxus PlasmaLiner Academy

International trainer for the low-temperature device

Developer of the Luxus PlasmaLiner and international Trainer for Permanent Make-up

Problem skin?

We have the right solution!

Application of Soft Plasma for problem skin:

- Acne
- hyperpigmentation
- rosacea
- hair growth stimulation

SOFT PLASMA is a gentle form of atmospheric plasma that works through ionized gases.

It increases skin pore size by temporarily opening the lipid barrier, thus increasing permeability for active ingredients.

The plasma energy interacts with cells and the intercellular space, activating cellular processes, promoting microcirculation and stimulating regeneration.

No down-time required!

The combination of plasma energy and highly effective mesotherapy preparations stimulates collagen fiber synthesis, increasing skin elasticity and density.

At the same time, SOFTPLASMA has antibacterial and anti-inflammatory effects, making it ideal for aesthetic and dermatological applications.

**All year round and without interruption
– even in summer!**

Soft Plasma - nonneedle therapy
